Year obtained: 2011

Motivation Letter

As a forensic psychologist and Assistant Professor at Universidade Fernando Pessoa, I have built sustained expertise at the intersection of prison education, professional capacity-building and evidence-based rehabilitation across multiple European projects.

As co-author of the AG4C Joint Course Curriculum and Manual (Erasmus+ KA3, IPS, 2022) and contributor to the LEADCOR project (Erasmus+ KA2), focused on leadership development and occupational stress reduction in correctional settings, I have direct experience designing transnational educational programmes and working within multi-country, multi-stakeholder consortia.

I am committed to EPEA's mission of promoting education in prison as a fundamental right. As Treasurer, I would contribute financial accountability, rigour and a strong evidence-based orientation to the association's governance and sustainability.
